University Physics by Harris & Benson University Physics by Harris & Benson provides a complete presentation of the subject of classical. The book is aimed at senior undergraduates with a physics degree but.Q: How can I add a css property to a cshtml page using an extension I am trying to add a property to some cshtml pages by writing the following extension: public static class PageExtensions { public static void AddCSS(this HtmlHelper htmlHelper) { htmlHelper.ViewContext.Writer.WriteLine(""); } } which i use like so: @Html.AddCSS() Then it prints the style out on the page, but after doing a bit of investigation I saw that the css class is not being applied to the html. Is there a work around to this issue? Or if it isn't possible should I be using something else such as script blocks? A: I was able to get this working using the following approach: I kept the extension above and added the below to a seperate class: public class MyBuilder : HtmlHelper { public override void WriteLine() { //do some work to determine what the new css class is var builder = new StringBuilder(); builder.Append(@""); writer.WriteLine(builder.ToString()); } } I then call the extension method in my view as: @Page.StyleClass This now works as expected. Q: R: Adding item to list and getting back the list I have a list as follows: >list.1 [1] d0c515b9f4
